Education

- **Sardar Vallabhbhai National Institute of Technology, Surat**
CGPA: 8.21 December 2020 - May 2025
- **Scottish Central School, Sasaram**
Percentage: 76 April 2017 - May 2019

Experience

- **Inspiron Labs** Bangalore
SDE-1 December 2025 – Present
 - Developed reusable frontend components using **React.js** and **TypeScript** within a **monorepo** architecture, reducing development time for new features by **20%**.
 - Implemented global state management using **Zustand** and integrated **GraphQL** APIs, improving API response efficiency and reducing redundant network calls.
 - Collaborated with product managers, designers, and backend engineers to design and deliver **10+ production-ready features** with improved maintainability and scalability.
 - Optimized component rendering using memoization and efficient state updates, reducing unnecessary re-renders by **30%** and improving UI responsiveness.
 - Modernized parts of the legacy frontend by migrating modules from **JavaScript** to **TypeScript**, reducing runtime bugs and improving type safety across shared modules.
 - Standardized UI development by building a library of **15+ reusable components**, ensuring design consistency and accelerating development cycles.
- **PCLnXAI** Ahmedabad
SDE-Intern July 2025 – October 2025
 - Resolved **5+ UI and functional bugs** in the HRInsight platform and developed responsive dark mode, achieving **99% cross-browser compatibility** using **Next.js**, **React.js**, **Tailwind CSS**, and **TypeScript**.
 - Built and deployed **2+ responsive landing pages** using reusable React components, HTML, CSS, and JavaScript, reducing average page load time by 32% and improving visitor engagement.
 - Integrated frontend modules with backend systems through **RESTful APIs**, improving data fetch performance by **40%** and lowering UI response latency.
 - Refactored component structure and API integration logic using React.js, TypeScript, and Git, and integrated CI/CD pipelines to improve maintainability and scalability of the frontend architecture.

Projects

- **BookBazaar**: Full-stack e-commerce platform with user and admin functionalities. [Live Project] [GitHub]
 - Developed a full-stack **e-commerce application** using **Node.js**, **Express.js**, **MongoDB**, and **React.js** supporting authentication, authorization, and secure session management.
 - Implemented product catalog, cart management, and user profile features, improving user session retention by **28%**.
 - Designed and built an **admin dashboard** for managing products, users, and orders, reducing manual operational work by **45%**.
 - Created REST APIs for product and order management to ensure efficient backend communication and scalable data handling.

Achievements

- **LeetCode** 🏆: Attained Knight Badge and secured a position in the top **5%** globally on LeetCode by mastering data structures and algorithms through solving 600+ problems.
- **CodeForces** 🏆: Mastered fundamental data structures and algorithms through participation in competitive programming on platforms like Codeforces, evidenced by achieving a rating of **1252**.
- **CodeChef** 🏆: Attained a CodeChef rating of **1609**, which placed within the top **35%** of the community, demonstrating a strong foundation in programming principles and dedication to continuous learning.

Skills

- **Languages**: C++, Java, JavaScript, TypeScript, SQL
- **Frontend Development**: React.js, Next.js, HTML, CSS, Tailwind CSS
- **Backend Development**: Node.js, Express.js, MongoDB, Redis
- **Tools & Technologies**: Git, GitHub, Postman, Chrome DevTools, VS Code
- **Core CS**: Data Structures & Algorithms, OOP, Operating Systems, DBMS, Computer Networks
